1. Claims 77, 83, 89, 95, 101, 107, and 113 are generic to a plurality of disclosed patentably distinct sequences comprising: SEQ ID NOS:20, 21, 22, 23, 24, 25, 26, and 27. These sequences are patentably distinct, each from the other, because of their materially different amino acid sequences. Searching all of the claimed sequences would constitute an undue burden on the examiner because different sequence searches would be required for each of the claimed sequences. Applicant is required under 35 U.S.C. 121 to elect a single disclosed sequence, even though this requirement is traversed. Generic claims 1-6, 12-16, 22-26, 32-36, 42-46, 52-56, 62-66, 72-76, 78-82, 84-88, 90-94, 96-100, 102-106, and 108-112 will be examined with the elected sequence.

Should applicant traverse on the ground that the sequences are not patentably distinct. applicant should submit evidence or identify such evidence now of record showing the sequences to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

This is not a species election, but a holding that the sequences are patentably distinct, one from the other.

2. In addition to the restriction requirement set forth above, regardless of which SEQ ID NO is elected above, the following election of species requirement is also imposed:

Each of SEQ ID NOS: 20, 21, 22, 23, 24, 25, 26, and 27 embraces numerous patentably distinct sequence species. These sequence species are patentably distinct form one another because the amino acids which can be present at each position vary widely with respect to structure, size, hydrophilicity/hydrophobicity, and/or charge. Applicant is required under 35

Art Unit: 1654

U.S.C. 121 to elect a single disclosed species which is embraced by the SEQ ID NO elected in the above restriction requirement for prosecution on the merits to which the claims shall be restricted if the generic SEQ ID NO is not finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 3. A telephone call was made to Attorney Thomas E. Holsten on March 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
